

P9 LightSelect

Developed by our lighting professionals, LightSelect offers the whole range of spectral and light combinations, from a soft beauty complexion to a pure feeling of summer to an all-round tan. In addition, you can build up a great pre-tan by using the spectral combinations in the right way - the right start to a relaxed vacation full of sunshine.

**PLEASE CONSULT A STUDIO EMPLOYEE
FOR AVAILABLE LIGHT SPECTRA.**

P9 hybridSun

BE STRONG.

The “power pack” of intensive tanning sun light and beauty light for a particularly deep tan and a pleasant skin feeling. Blue UV light penetrates deep into the skin, activates pigment formation and ensures a direct tan.

Red beauty light promotes collagen formation for a better tanning effect and visibly beautiful skin.

P9 smartSun

BE SMART.

The smart alternative with a clever balance of intensive sunlight and skin-caring beauty light. The pink glowing „smartSunlight“ combines the power of two spectral ranges. This results in an immediately visible, intensive tan.

Vitamin D and collagen formation are stimulated - for a fresh complexion and velvety skin feeling.
