K-SERIES vitaSun

 megaSun

vitaSun

COLORFUL SUMMER VIBES

For maximum tanning performance across three spectral ranges. The new blueSunlight activates the skin and enhances the effects of red light and UV. Additionally, it utilizes the visible range above 400nm to achieve even better direct pigmentation. The result: natural tan and increased vitality.

SUNSPHERE BLUE LEDs

The balanced SunSphere LED-technology of K6S and K7S combines not only the proven beauty and UVA-LEDs but also blue LEDs. The three corresponding UVB-special lamps complete the tanning experience in the facial area.

 megaSun

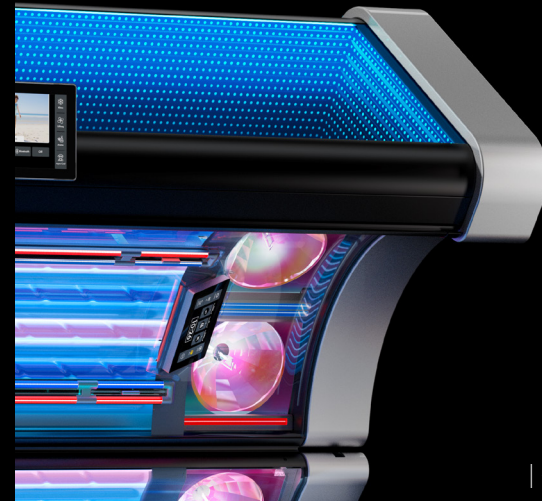

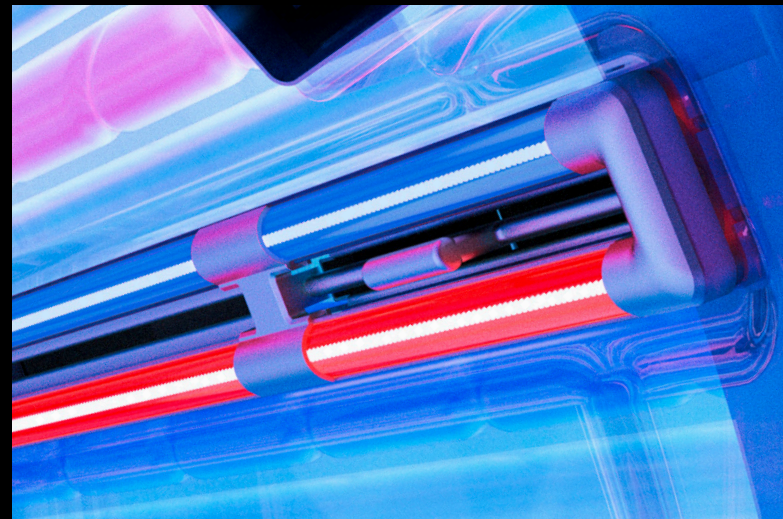

ACTIVATING BLUE LIGHT

In the body area of the K-Series vitaSun, half of the red nano-LEDs are supplemented by over 1000 blue nano-LEDs. This combination is also used in the facial area of the K6 and K7. This provides a noticeably softer skin and a powerful body feeling.

THE FUTURE
OF SUNSHINE

THE POWER OF CHOICE

blueSunlight

Activating blue light prepares the skin for a tanning session.

pureSunlight

Intensive sunlight for ideal tanning results.

smartSunlight

Intensive sunlight combined with soothing beauty light.

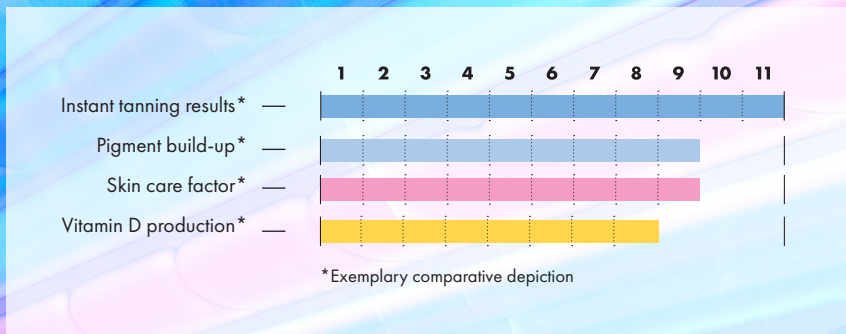

SunSphere Facials

Perfectly balanced spectrum of UVA-LEDs, Beauty LEDs and UVB special lamps.

SunSphere Shoulders

Balanced spectrum of UVA- and Beauty LEDs.

COLORFUL SUMMER VIBES

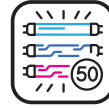

For maximum tanning performance from three spectral ranges.

The new blueSunlight activates the skin and enhances the effects of red light and UV. Additionally, it utilizes the visible range above 400nm to achieve even better direct pigmentation. The result: Natural tan and increased vitality.

The SunSphere LED-technology of P9S vitaSun combines not only the proven beauty and UVA-LEDs but also blue-LEDs. The three corresponding UVB special lamps complete the tanning experience in the facial area.

ACTIVATING BLUE LIGHT

The BeautyBooster HyperRed are also used in the body area in the P9S vitaSun and are supplemented by new blue LEDs by fifty percent. This provides a noticeably softer skin and a powerful body feeling.
