KBL GmbH
The Beauty & Health Company

Made in Germany. Not just a slogan, but also a promise that is guaranteed by our company to the greatest possible extent. The complete development achievements, including the manufacturing of the devices take place in our headquarters in Dernbach. The focus on our strengths allowed not only the development of devices, that represent a perfect combination of material, technology, design and aesthetics, but also a continuous progress towards pio-neering devices. Besides quality and outstanding customer services, KBL is exemplary for innovative products.

In 1996, as the first manufacturer of solariums, KBL obtained the **Environment Certificate DIN ISO 14001**, followed by the Environment Certificate for the entire management system in 2003.

In 2008 KBL put down a marker with the environmental label. The latest technology and innovations provide the possibility to use energy, weight and financial resources more efficiently. **For a green world.**

Only those who do research can discover new things, thereby creating innovation and growth. Due to the fact that KBL GmbH shows a special commitment to research and development, it was once again awarded with the **“Innovative through research“** seal by the Stifterverband, one of the largest private science sponsors in Germany.

Sophisticated concepts which pay off. In 2014 the Collarium® mon amie was nominated for the European Spa Award and was honoured with the “Best in Germany” distinction in the category of best technical Spa innovation. In the same year, the sportCollarium revolutionD, a concept for tanning beds specially developed for the fitness industry, was honoured with the Innovation Award by one of the leading fitness magazines as the most innovative product of 2014.

Why all this?

Certainly we have your best interests at heart, but we also feel obliged to a gentle and protective dealing with nature. Today is important, though it is absolutely essential for us to leave a lovable and livable world for our children.

KBL GmbH
The Beauty & Health Company

This price list is valid from **05/2019**.

All price lists issued prior to this date are no longer valid. The prices listed (in Euro) represent the prices for end customer. They are based on the quotation ex works Dernbach. We reserve the right to any technical or design modifications as well as changes in price and delivery. All KBL prices stated do not include any timer systems.

Exports and operation of KBL products listed in this catalogue to the USA or Canada are not permitted. In this case KBL does not accept any manufacturer liability. It is explicitly pointed out that any violation of this provision will involve substantial liability risks for the exporter and/our operator.

Technical equipment and design of tanning beds are in accordance with the statutory provisions of the respective country of destination.

For a period of 24 months, KBL GmbH ensures that the units at the time of delivery are not affected with any mistakes which may cancel or reduce the value or the capability for ordinary use (wear parts such as tubes, facials, starters and acrylics are excluded).

All deliveries are based on our current General Terms and Conditions.

* The above-mentioned instructions only apply to the use of original components manufactured by KBL.

Icons and their meanings

Intelligent Control System For studiooperator: Easy access to service and maintenance settings. No dongle needed. For customers: an intuitive way to preset all comfort features before the tanning session with a touch of a button.

pureSunlight Intensive sunlight for ideal tanning results.

beautyLight Soothing beauty light for an especially beautiful skin.

smartSunlight Intensive sunlight combined with soothing beauty light.

extraSunlight Sunlight with a high percentage of UVB for increased pigment development and vitamin D production.

pureFacials Intensive sunlight for the face and décolleté.

smartFacials Intensive sunlight plus soothing beauty light for the face and décolleté area.

beautyBooster Extra intensive beauty light for a beautiful skin.

evoSystem2 Reflectors for a better power distribution. Specially refined surfaces for considerably higher efficiency

electronic Power Electronic ballasts which considerably reduce energy consumption (33%) and the weight of solariums by nearly 100 kg

aroma Thanks to this optional feature., air can be flavoured during the tanning session.

aquaCool This feature produces a drip-free fine water spray by 2 special jets – refreshing and revitalising at the same time.

airCon The high performance air-conditioning system ensures a pleasant cooling during the tanning session.

cpi Energy Less energy consumption, more power and longer lifetime of the tubes; all current UV standards can be set on the display by only one click (only possible with original tubes).

Sun on/off UV light can optionally be turned on or off (only possible on Collarium®).

ACS controls – depending on the room temperature – the intensity of the ventilation and thus the noise level.

bodyCool The innovative megaSun allround ventilation including four separate air supplies ensures an incomparable fresh kick.

x-traTan Modern high pressure tanners ensure extra power and even tan in your shoulder area – more even, more intensive.

preSelection User-friendly display mounted outside the solarium / Collarium®. You can choose your level of well-being right before the tanning session.

beauty-Booster High-performance LEDs ensure an increased skin moisturizing, revitalisation, relaxation and detoxification of the skin.

Bluetooth® Listen to your favourite music from your own smartphone during the tanning session.

colorMotion Innovative LED technology, thrilling you with emotions. Choose your favourite colour with a touch remote control.

colorMotion plus innovative lights for the chassis. Choose your favourite colour with a touch remote control.

musicVibration makes you feel vibration of the music. This feature creates sound, making large surfaces vibrate as a membrane. Thus the sound is distributed more homogeneously in the tanning tunnel and becomes a perfect sound experience: Feel the music!

megaVoice A pleasant voice helps the customer to operate the menu of the tanning bed easily and quickly. Thus it is impossible to make mistakes and ensures the customer feels comfortable, even until the voice says goodbye.

mp3-Sound box Each studio operator can upload music individually to an integrated mp3 player.

volumeControl This feature provides you with constant sound experience. The volume of the internal and external music player is adapted automatically to the volume level of ventilation.

HPE +36% (High-Performance-Efficiency) stands for High Performance Efficiency and means 36% more performance and simultaneous reduction of energy consumption and heat development.
