SunSphere UVA-LEDs

SunSphere Beauty LEDs

UVB-ThinLights

It's immediately obvious that it's a quantum leap in the field of spectral technology. High-performance LEDs only produce the wavelengths desired for a beautiful tan and a gentle tanning experience.

At the same time, aspherical lenses in front of the LEDs guarantee an absolutely homogeneous illumination of the face and décolleté. Progress that is immediately noticeable and, with the P9S, was also implemented in the leg and shoulder areas.

SUN IN BEST SHAPE

140 UVA-LEDs

A beautiful tan just the way you like it. 140 blue UVA LEDs guarantee an optimally dosable direct pigmentation of the face and décolleté.

3 UVB SPECIAL LAMPS

The perfectly balanced output from three yellow UVB special lamps builds up new color pigments and vitamin D in your skin.

56 BEAUTY LEDs

With 56 red Beauty LEDs, the P9S provides skin care for the face and décolleté even while sunbathing and stimulates the oxygen supply in the skin at the same time. For a beautiful complexion and a silky smooth skin.

PERFECT SYMBIOSIS

The new SunSphere System consisting of high-performance LEDs and aspherical glass lenses is also implemented in the shoulder area. A spectral combination that guarantees beautiful complexion. The integrated Sound System ensures a brilliant sound experience. And a voice assistant guides through the operating functions.

ATTENTION TO DETAIL

Particularly for an extra-beautiful tan of insteps and shins, the P9S uses special SunSphere components as a world first. Two groups, each with five angled UVA LEDs and aspherical glass lenses, guarantee excellent tanning results.

AIRANGEL

TRIPLE AIRPURIFICATION
FROM THE UV-SPECIALIST

AIRANGEL AP-10

www.airangel.eu

OPTIMAL AIRFLOW.

Using the newly developed AirAngel AP-10 we are now able to offer 99,9% purified air during the tanning session. Every unit of the following series can be ordered or retrofitted with the air purification device: P9S-Series, P9-Series and 8000er-Series.

AIRANGEL AP-10 PACKAGE.

The TripleShield technology allows us to purify the air during the tanning session. It combines three types of disinfection/cleaning in a particularly effective package. With the aid of HEPA filters, UV-C and plasma, AirAngel AP-10 ensures maximum air purification.

APPLICATION POSSIBILITIES.

AirAngel air purification systems are used wherever the quality of the ambient air is important and contamination has to be neutralised effectively.

AirAngel devices can be placed in any indoor environments. Suitable for high traffic areas.

INVISIBLE YET SO IMPORTANT.

The impact of air quality on our lives is often underestimated. Every day we breathe in an average of 10,000 litres of air and in the current situation the quality of this air is even more important.

In closed rooms where people are present, viruses, bacteria and germs can spread quickly. Viruses do not move individually in the air but are enclosed in larger droplets.

When breathing, everyone emits tiny droplets (aerosol particles), which multiply rapidly in the air and may lead to an increased concentration of infectious particles.

Each breath may contain 1,000 to 50,000 droplets. When coughing or sneezing, the droplets are ten times larger. If the supply of fresh air is limited, not only do germs and viruses increase but also the risk of infection and contagion indoors.
